Summary: Although many Americans believe that people with mental disorders pose a danger to themselves or others, the science reveals a more nuanced picture. Suicide risk is indeed elevated among people with certain mental illnesses (e.g., schizophrenia, depression, borderline personality disorder, bipolar disorder, and anxiety disorders), but suicide among those with such diagnoses is still rare.

Impact on a broad range of measures. Future studies should look at a broader range of outcomes, in particular work-related outcomes and health-related quality of life. Work-related outcomes, such as absenteeism, productivity, and retention, are of critical importance to employers as they directly affect business performance.

Workplace Wellness Programs Study: Final Report

Summary: There is no standard definition of what constitutes a mass shooting, and different data sources—such as media outlets, academic researchers, and law enforcement agencies—frequently use different definitions when discussing and analyzing mass shootings. For instance, when various organizations measure and report on mass shootings, the criteria they use in counting such events might ...

The current studies investigated the potential impact of anti-vaccine conspiracy beliefs, and exposure to anti-vaccine conspiracy theories, on vaccination intentions. In Study 1, British parents completed a questionnaire measuring beliefs in anti-vaccine conspiracy theories and the likelihood that they would have a fictitious child vaccinated.

The Effects of Anti-Vaccine Conspiracy Theories on ...

However, for a third of global crop calorie production, these emissions represent less than 5% of farm-stage GHGs. It may be the case that low-impact farms have similar impact drivers. We again find variable sources of impact, even for low-impact farms (Fig. 2, C and D). Reducing impacts means focusing on different areas for different producers ...
