American Journal of Obstetrics and Gynecology, Vol.218, No.2, S745-S761 February 2018 Delayed vs early umbilical cord clamping for preterm infants: a systematic review and meta-analysis

Home Page: American Journal of Obstetrics & Gynecology

According to ACOG, 42 percent of obstetricians have experienced a liability claim, many of which can be attributed to issues in proficiency and team communication and could be avoided with targeted and timely training, education and analytics. Relias OB, formerly GNOSIS TM, is a comprehensive program designed to improve quality and patient safety in five high-acuity obstetrical areas.

Advanced Education for Obstetrics Teams | Relias

Obstetric intervention originally consisted of extraction of the baby, usually by the breech, to save the mother's life in obstructed labour. Forceps, introduced in the 17th century, were later refined by men-midwives like William Smellie. In Victorian times, Simpson championed chloroform anaesthesia, Lister pioneered antiseptics, and caesarean section was introduced.
