The element that makes Belkin's N1 MIMO technology different from a conventional radio is the use of multiple antennas and two simultaneous data streams to deliver wireless transfers around your home or office. A conventional radio uses one antenna to transmit a data stream. Belkin's N1 MIMO, on the other hand, uses three antennas.

The N1 Vision is not just a high-end wireless router it comes in a nice package and has the most compelling design of a wireless router I've ever seen. Wrapped and sealed in a nice package and when you open it you feel and see that Belkin has put a lot of effort into making this a high-end product.
