Brain-Based Parenting: The Neuroscience of Caregiving for ...

Learning to be a "good parent" is contingent upon learning how to manage this stress, understand its brain-based cues, and respond in a way that will set the brain back on track. To this end, Hughes and Baylin define five major "systems" of caregiving as they're linked to the brain, explaining how they operate when parenting is strong and what happens when good parenting is compromised or "blocked."
