Chevreul S Colour Theory And

Subtractive color or subtractive color mixing predicts the spectral power distribution of light after it passes through successive layers of partially absorbing media. This idealized model is the essential principle of how dyes and inks are used in color printing and photography where the perception of color is elicited after white light passes through microscopic "stacks" of partially ...

Subtractive color - Wikipedia

Complementary colors are pairs of colors which, when combined or mixed, cancel each other out (lose hue) by producing a grayscale color like white or black. [better source needed] When placed next to each other, they create the strongest contrast for those two colors. Complementary colors may also be called "opposite colors". Which pairs of colors are considered complementary depends on the ...

The attention to color, so evident in this work, has been attributed to both Delacroix's interest in and study of the work of Peter Paul Rubens and Michel-Eugene Chevreul's theories on color. For instance, Delacroix contrasts the warm yellow and orange tones above with the cooler blue and violet tones below.
