### **Use Online \* IpCisco**

If I want to use classless IP networks, can I ignore the class of the IP address completely? Can I have a IP address something like 172.17.2.15/6?

Thanks, Logger.

## **4.4.9 Lab - Troubleshoot Inter- VLAN Routing (Answers)**

Hello Kapil. It is true that the 172.16.0.0 subnet is a class B address, and thus in classful IP addressing it would have a prefix of /16 rather than /24.
