To achieve a moderate number of medium-sized crystals, a container which has a few scratches works best. Likewise, adding small previously made crystals, or seed crystals, to a crystal growing project will provide nucleating sites to the solution. The addition of only one seed crystal should result in a larger single crystal.

Growing Quality Crystals. According to the old rule Garbage In = Garbage Out, a crystal structure is only as good as the crystal used for data collection. Therefore it is worthwhile spending time on improving the quality of your crystals. Even though growing crystals is more of an art than a science and luck is a major factor, there are some things to do and some other things not to do.

Crystal radios had no amplifying components to increase the loudness of the radio signal; the sound power produced by the earphone came solely from the radio waves of the radio station being received, intercepted by the antenna. Therefore, the sensitivity of the detector was a major factor determining the sensitivity and reception range of the receiver, motivating much research into finding ...
