ease as review them wherever you are now.

Free Computer Books: Every computer subject and programming language you can think of is represented here. Free books and textbooks, as well as extensive lecture notes, are available.

## **Early Breast Cancer From Screening**

Breast cancer that's found early, when it's small and has not spread, is easier to treat successfully. Getting regular screening tests is the most reliable way to find breast cancer early. The American Cancer Society has screening guidelines for women at average risk of breast cancer, and for those at high risk for breast cancer. What are screening tests? The goal of screening tests for breast cancer is to find it before it causes symptoms (like a lump that can be felt).

effective method to detect early stage disease and decrease mortality. Although politics and economics may inhibit organized mammography screening programs in many countries, the judicious use of proficient clinical and self-breast examination can also identify small tumors leading to reduced morbidity.

### **Early Detection and Screening for Breast Cancer**

BreastScreen Australia targets women aged 50 to 74, as 75% of all breast cancers occur in women over the age of 50. Screening mammograms are often less reliable for women under 40 years of age. The density of breast tissue in younger women often makes it difficult to detect cancers on mammograms.

### **Early detection of breast cancer | Cancer Council**

A mammogram is an X-ray of the breast. For many women, mammograms are the best way to find breast cancer early, when it is easier to treat and before it is big enough to feel or
