Don't put untreated wood in your aquarium. Many of the wooden ornaments that you find in pet shops have been treated, so they are fine to include. But you can't just put un-treated wood into your aquarium. This can alter the chemistry of the water in your tank. Driftwood is fine to add and is a nice addition to an aquarium.

### 10 Things You Shouldn't Put In Your Fish Tank ...

A cold seep (sometimes called a cold vent) is an area of the ocean floor where hydrogen sulfide, methane and other hydrocarbon-rich fluid seepage occurs, often in the form of a brine pool. Cold does not mean that the temperature of the seepage is lower than that of the surrounding sea water. On the contrary, its temperature is often slightly higher. The "cold" is relative to the very warm (at ...

### Cold seep - Wikipedia

Increase freshwater flows and tidal exchanges in coastal waters to increase flushing, prevent stagnation, and enhance the composition of coastal phytoplankton communities. In some instances, this will require modifying built structures such as breakwaters, jetties, and dams that impede flow of fresh and salt water [ 387 ] (See Text Box 4 ).
