In this post, I'm going to show you how to set up and run your very own private, dedicated Minecraft server in the cloud. I have blogged about this before but in that post, the server was limited to 1 CPU core and 1 GB of RAM. In this post, we're going to create a server with up to 4 CPU cores and 24 GB of RAM! That's more than enough resources to host a game with 20+
