Physical Education

Physical exercise is the act of improving one's body through specific intentional movements. Fitness is the ability of the body to function effectively and efficiently during physical activity. The difference between the two words is important: while anyone can exercise, only someone who exercises regularly can be fit. Fitness 2

Unit 1: Introduction to Physical Education Flashcards ...

Physiology is the study of the function of tissues (e.g., muscle, nerve), organs (e.g., heart, lungs), and systems (e.g., cardiovascular). Exercise physiology extends this to evaluate the effect of a single bout of exercise (acute exercise) and repeated bouts of exercise (i.e., training programs) on these tissues, organs, and systems.
