Shaw Equipment Information: Gateway HDPVR

The WD TV is a consumer device that was produced by Western Digital which plays videos, images, and music from USB drives or network locations. The device was introduced in 2008 and played high-definition video through an HDMI port, and standard video through composite video cables. The device had support for most common video and audio formats. The WD TV was discontinued as of August 2016.

Sometimes, it is necessary to convert media file from one format to another (or to the same format) without changing video or audio stream. If you choose "Direct Stream Copy" from the drop-down list of Video Codec or Audio Codec, then conversion will be very quick, because that involves no re-encoding, just saving into a different format.
