Pythagorean tuning is a system of musical tuning in which the frequency ratios of all intervals are based on the ratio 3:2. This ratio, also known as the "pure" perfect fifth, is chosen because it is one of the most consonant and easiest to tune by ear and because of importance attributed to the integer 3.

- **Wikipedia**

The music of the spheres is an ancient philosophical concept that regards the proportions in the movements of celestial bodies – the Sun, Moon, and planets – as a form of “ musica “, the Medieval Latin name for music. Pythagoras and his followers believed that a universal philosophy could be found in numbers.
