[PDF] Quaternary Glaciations Extent And Chronology ...

There have been five or six major ice ages in the history of Earth over the past 3 billion years. The Late Cenozoic Ice Age began 34 million years ago, its latest phase being the Quaternary glaciation, in progress since 2.58 million years ago.. Within ice ages, there exist periods of more severe glacial conditions and more temperate referred to as glacial periods and interglacial periods ...

ANNOUNCING Quaternary Glaciations: Extent and Chronology

This book is the first of three volumes in which the recent knowledge of the extent and chronology of Quaternary glaciations has been compiled on a global scale. This information is seen as a fundamental requirement, not only for the glacial workers, but for the wider user-community of general Quaternary workers. In particular the need for accurate ice-front positions is a basic requirement ...
