TR-808 Rhythm Machine. Roland Engineers discuss the initial concept of the TR-808 which was conceived and built in 1980. Although it was designed to create "backing tracks," creative musicians started to use the Rhythm Machine as an instrument and music changed forever. Now the evolution begins again. MX-1 with Ableton Live and TR-8

### Roland - TR-8 | Rhythm Performer

The 808, or Roland TR-808 Rhythm Composer, was developed in 1980 and discontinued in 1983.It was met with mostly unfavorable reviews at the time because the preloaded analog drum beats were found by many to sound too unrealistic for the electronic music scene of the time.

### 808 | Dictionary.com

The Roland TR-808 Rhythm Composer, commonly known as the 808, is a drum machine manufactured by the Roland Corporation between 1980 and 1983. It was one of the first drum machines to allow users to program rhythms instead of using preset patterns. Unlike its nearest competitor at the time, the more expensive Linn LM-1, the 808 generates sounds using analog synthesis rather than playing samples.

### Roland TR-808 - Wikipedia

The TR-08 is an obsessively detailed and faithful replica of the legendary TR-808—easily the most famous and influential drum machine ever made. After creating a monumental shift in the sound of music, the "808" has continued to shape and define entire genres.

### Roland - TR-08 | Rhythm Composer

This was one of the the first rhythm machines to be housed in the wooden box-style that would come to characterize the Roland drum machines of the later 1970s. It offered eight analog drum sounds with volume and balance controls. The balance control was capable of completely muting either the hi-hats or bass drum.
