can be utilized and updated while conducting field work.

Digital geologic mapping - Wikipedia

8.1.1 Introduction. One of the most promising applications of scRNA-seq is de novo discovery and annotation of cell-types based on transcription profiles.

Read Online Software Testing And Analysis Mauro Pezze

Computationally, this is a hard problem as it amounts to unsupervised clustering. That is, we need to identify groups of cells based on the similarities of the transcriptomes without any prior knowledge of the labels.
