### Stephen Murray Magnetic Field Answers

Lived 1544 - 1603. William Gilbert founded the scientific study of magnetism and is regarded, together with Galileo, as a founding father of experimental science. A forceful advocate of the power of the scientific experiment, Gilbert discovered that our planet has two magnetic poles; he defined these poles correctly and established that the earth behaves

Quantum field theory emerged from the work of generations of theoretical physicists spanning much of the 20th century. Its development began in the 1920s with the description of interactions between light and electrons, culminating in the first quantum field theory—quantum electrodynamics.A major theoretical obstacle soon followed with the appearance and persistence of various infinities in ...
