Xpce Prolog Course Notes - publicisengage.ie

Like they mention in it's manual, XPCE is not Prolog; XPCE is an object-oriented language that has absolutely nothing to do with Prolog. The first thing that we need to do to create applications in XPCE is to install Swi-Prolog. You can find it at it's distributor page. The page about XPCE is <http://www.swi-prolog.org/packages/xpce/>.

Programming in XPCE/Prolog

6.2 Dealing with Prolog data. By nature, XPCE data is not Prolog data. This implies that anything passed to a XPCE method must be converted from Prolog to something suitable for XPCE . A natural mapping with fast and automatic translation is defined for atoms, and numbers (both integers and floating point).

SWI-Prolog is a Prolog implementation based on a subset of the WAM (Warren Abstract Machine). SWI-Prolog was developed as an open Prolog environment, providing

SWI-Prolog 5

XPCE. XPCE is a platform-independent object-oriented GUI toolkit for SWI-Prolog, Lisp and other interactive and dynamically typed languages. Although XPCE was designed to be language-independent, it has gained popularity mostly with Prolog. The development of the XPCE graphic toolkit started in 1987, together with SWI-Prolog.

how to create a button to do some function in xpce/prolog ...

XPCE is an object-system written in the C-language. It provides for the implementation of methods in multiple languages. New XPCE classes may be defined from Prolog using a simple, natural syntax. The body of the method is executed by Prolog itself, providing a natural interface between the two systems. Below is a very simple class definition.

(PDF) SWI-Prolog

The programming is done in Prolog or some other language and with Prolog as the glue, while XPCE is mostly a passive GUI, sort of like HTML forms. The program creates XPCE objects, changes their state and reads values from them. XPCE doesn't normally write to the program other than some small GUI-related messaging; but even that is usually done ...
